

# Suma<sup>®</sup> Glass Protect

Liquid mechanical glass washing detergent for medium hard water

# Description

**Suma Glass Protect L44** is a concentrated liquid mechanical glass washing detergent specially formulated to provide good soil removal in glass wash machines.

## Key properties

**Suma Glass Protect L44** is an alkaline liquid detergent which is suitable for use in a wide range of glass washing machines. Next to a blend of alkali and powerful scale control agents, which will provide excellent removal of fats and dried-on food, it contains a special ingredient for protection of glass surfaces. The powerful scale control agents will also prevent scaling in medium hard water conditions.

#### **Benefits**

- Will prevent rapid corrosion of glass surfaces
- Cuts through grease and dried-on food
- Gives great economy in use as highly concentrated
- Prevents scaling of the dish wash machine in medium to hard water conditions

#### Use instructions

**Suma Glass Protect L44** is normally applied using Diversey Care automatic dispensing equipment. It can also be used in conjunction with integral dosing pumps where these are fitted. To ensure acceptable cleaning results dose at a concentration of 1-4g/L, depending on local site conditions. At 2g/L, this will prevent scaling in water containing up to 100 ppm CaCO<sub>3</sub>.

Before first use rinse pump and transport tubes of the dosing system to avoid product crystallization caused by mixing with previously used products.

### Technical data

Appearance:	clear light yellow liquid
pH (1% solution):	12.6
Relative density:	1.27

These figures are typical values and should not be interpreted as specifications.

#### Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet.

Store in original container. Avoid extremes of temperature.

#### Product compatibility

Under recommended conditions of use, **Suma Glass Protect L44** is suitable for use on most materials commonly encountered in the kitchen. Do not however use on alkali sensitive items such as copper, brass, aluminium or rubber.
